Company: GoldTech was founded in January of 1999 and was formally formed as an LLC on December 16th, 1999. With it's initial service offerings being Structured Cabling Design/Installation, the first year we were able to establish ourselves in the market place and gain the confidence of our client base. After gaining the confidence of our clients, GoldTech was restructured in February of 2005 to further focus it's efforts with the establishment of practices. The restructure gives GoldTech a more clearly defined market focus and our clients more service options. GoldTech was founded by Kelvin Gholston, the current President and CEO.
